

BUONO TOURS

Live the moments. Tell stories for years.

“One Sign. Three Worlds. One Meaning.”

OVERVIEW & METADATA

Client	Buono Tours (Hurghada & Red Sea Experiences)
Industry & Market	Tourism, DMCs, Italian Outbound Travel & Excursions
Project Status	Ongoing Strategy & Digital Presence
Scope	Brand Strategy, Digital Identity, Website & Social Media

THE BRIEF

Created specifically for Italian travelers who want far more than standard sightseeing. Buono Tours delivers authentic Red Sea adventures—from diving and snorkeling to immersive desert safaris.

What it lacked was a cohesive digital presence that could make local expertise fully visible, recognizable, and trusted long before arrival in Egypt.

THE SITUATION

Travelers wanting to discover and book excursions online faced fragmented information and generic operators. Buono Tours possessed deep local knowledge of the Red Sea but needed to translate that trust into digital touchpoints.

Core Question: How do we make travelers feel a sense of familiarity and local belonging before they even land in Egypt?

THE JOURNEY & OBSERVATION

We look far beyond the destinations themselves to uncover the full spectrum of destination storytelling: spontaneous activities, shared meals, laughter by the campfire, and personal connections with local guides. Photography becomes candid, warm, and documentary-style, highlighting human relationships and real moments rather than sterile postcard landscapes.

OUTCOME & BRAND IDENTITY

The brand is built around the unifying concept: **One Sign. Three Worlds. One Meaning.** This gives the agency a powerful symbol that brings together universal signals across different languages, bridging the gap between foreign visitors and local hospitality.

By overcoming DMCs and generic limitations, Buono Tours establishes a seamless journey from the very first digital click to unforgettable real-world memories.
